

America was built on the concept of freedom and freedom of choice. It is not up to the National Association of Broadcasters to determine what my choices should be, it is MY choice. I have chosen to subscribe to and pay for XMRadio because of the superior programming choices it offers, including excellent traffic and weather information.

I submit that the FCC should not silence the freedom of choice that XMRadio subscribers have, they should be encouraging the other broadcasters to improve the quality of their offering to come up to the standards that are being set by XMRadio.
